Summary

I am a skilled and versatile Linux administrator and sysadmin with over five years of extensive experience in python and golang development, database administration, system analysis and DevOps. I have a strong background in backend development and I am proficient in a wide range of technologies and tools, such as Linux, Python, MySQL, Bash, PostgreSQL, Go, Web Development, Docker, Prometheus Etc. I am always eager to learn new technologies and tools and to apply them to solve real-world problems. I have successfully completed several projects involving web development, data analysis, automation and monitoring. I am passionate about IT and technology trends and a staunch advocate of free software. I believe in the power of open source and collaboration to create innovative solutions. In my spare time, I enjoy watching theater, listening to music and swimming for relaxation and fitness. I am also an avid reader of books and blogs related to IT and technology.

Experience

Developer and system administrator

AftabNetwork

Feb 2020 - Present (3 years 6 months)
